## GOLD & SILVER MINING

Commonly seen as a great store of wealth, this precious metal is also known as a reliable safe-haven asset. With a rich history amongst almost all global cultures, gold remains a highly popular investment. Although it has multiple uses, its primary function is typically to hedge against inflation in an often volatile futures market, as well as to diversify existing Precious Metals Investment Retirement Accounts. Gold has been one of the most valuable precious metals throughout human history, used by elites as a symbol of wealth for centuries due to its rarity and its ability to hold its worth for a long time. volatile currency.

## BITCOIN MINING

Cryptocurrency is a form of payment that can be exchanged online for goods and services. Many companies have issued their own currencies, often called tokens, and these can be traded specifically for the good or service that the company provides. Think of them as you would arcade tokens or casino chips. You'll need to exchange real currency for the cryptocurrency to access the good or service. Cryptocurrencies work using a technology called blockchain. Blockchain is a decentralized technology spread across many computers that manages and records transactions. Part of the appeal of this technology is its security. Cryptocurrencies are sets of software protocols for generating digital tokens and for tracking transactions in a way that makes it hard to counterfeit or re-use tokens. which is why at Vertex we pride ourselves in ensuring you choose the right investment plan for you. More than 10,000 different cryptocurrencies are traded publicly, according to CoinMarketCap.com, a market research website. And cryptocurrencies continue to proliferate, raising money through initial coin offerings, or ICOs. The total value of all cryptocurrencies on Aug. 18, 2021, was more than \$1.9 trillion – down from April high of \$2.2 trillion, according to CoinMarketCap. The total value of all bitcoins, the most popular digital currency, was pegged at about \$849 billion, regaining some ground from recent price lows. Still, the market value of bitcoin is down from April high of \$1.2 trillion with our 24/7 support staffs present, we work round the clock to ensure smooth user experience.
